宏观与跨资产专题 Macro & Cross-Asset Special v20261015-0757

数据快照 20261015-0757 (SGT)。来源: FRED、Yahoo Finance。非投资建议。

1. 结论摘要 (INFERENCE)

- 通胀: CPI 同比 +3.7% (2026-09-01)，核心 CPI +2.6%，核心 PCE +3.0% (2026-08-01)——仍高于 2%目标。
- 政策利率上限 4.0% (2026-10-14)；10Y 5.21%；10Y 实际利率 2.88%；2s10s 0.37%。
- 美元净流动性代理 ≈ 5,867 bn USD (WALCL−RRP−TGA)。
- 套息压力 Carry Stress: **CALM** (USD/JPY 1个月 +1.7%，VIX 16.9)。
- 高收益利差 HY OAS 3.16%；芝加哥金融条件指数 NFCI -0.494（负=宽松）。

2. 传导链 Transmission chain

通胀/就业 → FOMC 反应函数 → 2Y → 10Y(含期限溢价/财政) → 实际利率 → WACC → 成长股估值倍数；BOJ → JGB → USD/JPY 速度 → 套息平仓 → 全球流动性。

3. 市场心理与资金 (证据要求)

- 本版可用证据: 跨资产价格(见热力图)、VIX、信用利差。CFTC 持仓/基金经理调查/期权偏度 **UNAVAILABLE**（未接入），因此不对”机构定位”作断言。
- 反身性观察: 若 AI 龙头上涨同时 HYG 下跌 → 脆弱的风险偏好。

4. AI 生产率 → 通胀 → Fed (专题框架)

AI Capex ↑ → 生产率 ↑ → 单位劳动成本 ULC ↓ → 核心通胀 ↓ → Fed 更鸽 (鸽派路径)；或 AI Capex ↑ → 电力/建设/芯片需求过热 → 通胀 ↑ → Fed 更鹰 (过热路径)。证据: 11/5 生产率与成本(BLS, CONFIRMED)、ECI 10/30。

7. 风险与证伪

- 若核心 PCE 连续 3 个月月率≤0.2% → “高通胀粘性”假设被证伪。
- 若 USD/JPY 在 1 个月内下跌>5% → 套息压力升级、科技股倍数受压。 ## 8. Source Ledger FRED series IDs as listed (latest observation dates in table); Yahoo Finance daily closes snapshot 20261015-0757. ## 9. Assumption Register Carry rule thresholds (ASSUMPTION); net-liquidity proxy definition (METHOD).

图片报告 Image Report

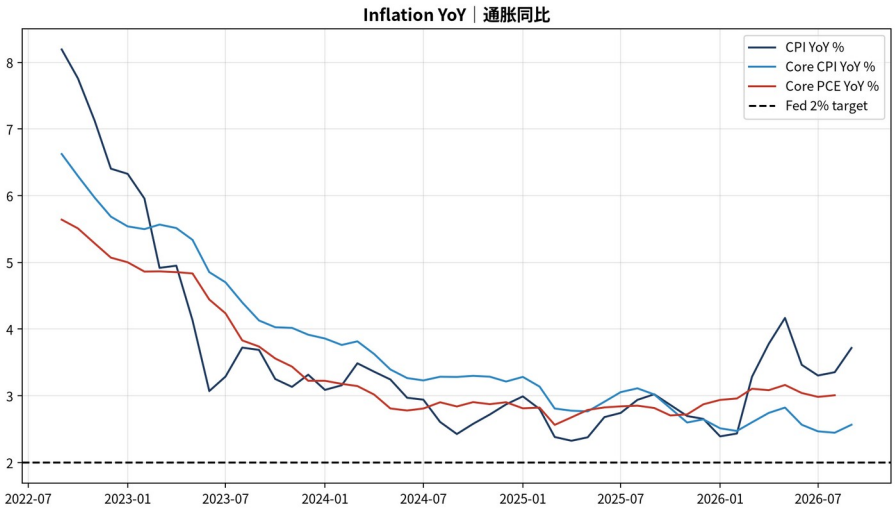

macro_1_rates

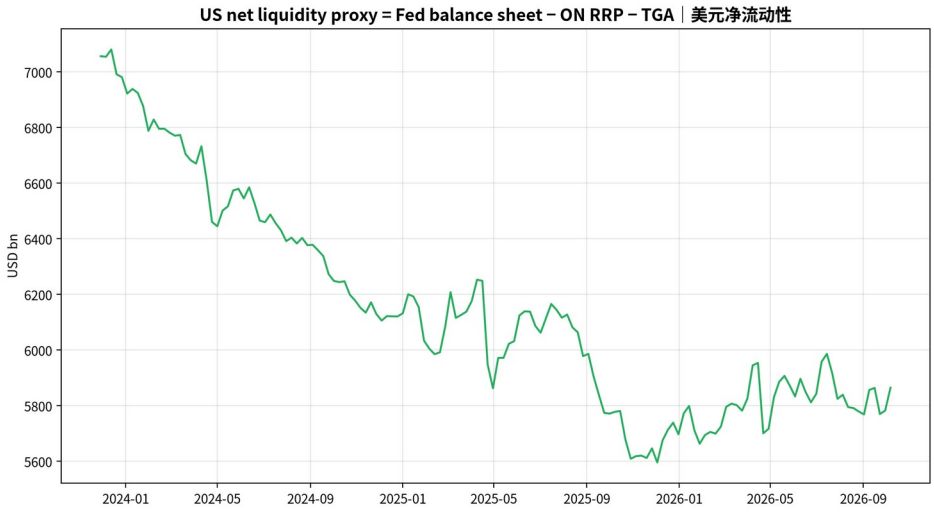

Claim class 声明类别: DATA + INFERENCE (status rule: USDJPY 1m < -3% or VIX>25 = ELEVATED) | Source 来源: Yahoo Finance
Thinking 思考: Watch JPY SPEED, not level: fast yen strength forces carry unwinds → global de-risking. | Not investment advice 非投资建议

macro_2_carry

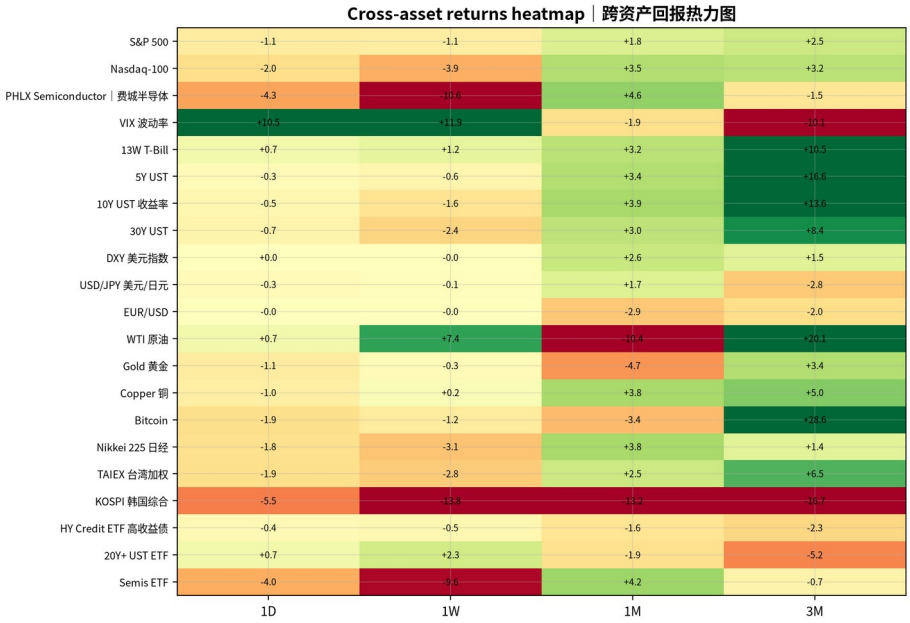

Claim class 声明类别: CONFIRMED (computed YoY) | Source 来源: FRED: BLS CPI, BEA PCE
Thinking 思考: Core PCE is the Fed's target gauge; distance from 2% sets the policy bias. | Not investment advice 非投资建议

macro_3_inflation

Claim class 声明类别: DATA + INFERENCE (proxy) | Source 来源: FRED WALCL, RRPONTSYD, WTREGEN
Thinking 思考: Rising net liquidity tends to support risk multiples; it is a proxy, not a cause by itself. | Not investment advice 非投资建议

macro_4_liquidity

Claim class 声明类别: DATA | Source 来源: Yahoo Finance
Thinking 思考: Look for divergences: e.g., equities up while credit (HYG) down = fragile risk-on. | Not investment advice 非投资建议

macro_5_crossasset

Macro & Cross-Asset Special (English) v20261015-0757

- Inflation: CPI YoY +3.7%, core CPI +2.6%, core PCE +3.0% — above 2%.
- Fed funds upper 4.0%; 10Y 5.21%; 10Y real 2.88%; 2s10s 0.37%.
- Net liquidity proxy ≈ 5,867 bn USD. Carry stress: **CALM** (USD/JPY 1M +1.7%, VIX 16.9).
- Positioning claims are withheld: CFTC/fund-manager survey/option skew feeds are UNAVAILABLE in v1.
- AI productivity → inflation → Fed: two competing paths (dovish productivity vs overheating); key evidence Nov 5 Productivity & Costs, Oct 30 ECI.
- Falsifiers: core PCE ≤0.2% m/m for 3 months; USD/JPY −5% in a month. Tables: see Chinese section (bilingual labels).
