2. 生命周期模板 Lifecycle templates (每个重大事件必须走完)

A. 发布前 Pre-release (T-2d→T-1h)

1. 共识与区间 Consensus & range (来源+时间) 2. 我们的预测 vs 共识 (预期差) 3. 情景树 Hot/Inline/Cool 及概率 4. 每个情景的跨资产传导 (2Y/10Y/USD/JPY/NDX/SOX/个股) 5. 受影响个股清单与敏感度 6. 观察清单: 看哪些分项 7. 证伪条件 8. 初学者解读 ### B. 发布时 Live (T→T+2h)
2. 实际值 vs 共识 vs 我们 (Surprise = Actual − Expected) 2. 分项拆解 3. 首 30 分钟市场反应 (Headline vs Fundamental) 4. 反应分解 ΔPrice ≈ ΔEPS + ΔMultiple(rates) + ΔPositioning + ΔLiquidity 5. 是否触发模型更新 ### C. 发布后复盘 Post-release (T+1d)
3. 原假设→预测→实际→偏差→反应 2. 误差分类 (Fundamental / Expectation-pricing / Market-reaction / Timing / Probability) 3. 根因 4. 模型重校准 (哪些假设改变、改多少) 5. 估值更新 (重跑 Excel) 6. 学习要点 7. 追加到当日 Daily OS 更新 ### D. 财报事件 Earnings Pre: 一致预期 EPS/收入、上季指引、关键 KPI、隐含波动；Live: 实际 vs 指引 vs 一致预期、新指引、电话会要点；Post: 修改 Assumption Register → 重跑模型 → 新版本报告 (旧版保留)。 ## 3. 最近重大事件: 美国 9 月 CPI (10/14 08:30 ET = 10/14 20:30 SGT) — Pre-release book

- 最新已知 (FRED): CPI 指数 334.131 (2026-08-01)；核心 CPI 同比 +2.8%。
- 共识: **UNAVAILABLE** in automated feed — 需在发布前从 Reuters/Bloomberg/WSJ 调查补录 (不编造)。

- 情景: Hot (核心月率高于共识≥0.1pp) → 2Y↑、USD↑、NDX/SOX↓、高估值(PLTR/ARM/CRWV)最敏感；Inline → 关注 10/28 FOMC 定价；Cool → 成长股、长久期资产受益。
- 证伪: 若 Hot 但 10Y 下行 → 市场更担心增长/风险规避，而非通胀。
- 发布后: 运行 Refresh → 生成新版本日报 + 本文件 Post 部分。

English: Calendar above uses bilingual labels. Lifecycle = Pre (consensus, our view, scenario tree, transmission, falsifiers) → Live (surprise, decomposition) → Post (error class, root cause, recalibration, valuation rerun, append to Daily OS). Next major: US CPI Oct 14 08:30 ET; FOMC Oct 28; BOJ Oct 30; TSM earnings Oct 15 (TENTATIVE).
