Weekly Radar & Review — 2026-W42 (2026-10-12 – 2026-10-16)

v20261017-0807-2026-W42 | built 2026-10-17 08:07 SGT | Not investment advice | Data: yfinance closes (base = close on/before 2026-10-09), OS event books, dated press sources.

1. The week in one paragraph

AI/semis de-rated hard: Nasdaq -4.5%, SOX -11.4%, S&P -1.9%, Dow +0.7% (rotation into industrials/energy). Two overlapping shocks: (1) CXMT's higher-density server-DRAM progress triggered memory-supply fears; (2) hot CPI/PPI, Brent touching $110 and widening credit spreads for levered AI borrowers (a CoreWeave bond at 15%; Broadcom/Intel CEO warnings) put the financing of the debt-funded AI build-out in question. Note the 10Y yield FELL ~15bp on the week — the stress was in credit and crowding, not Treasuries. Coverage median -14.5%; worst CIEN -26%、MXL -26%、COHR -26%; best AAPL +2%、CCL -2%、QCOM -2%.

2. Timeline (FACT, dated sources)

- **10/10–12 周末–周一**: CXMT (ChangXin Memory) announced a higher-density server-DRAM architecture; SOX −2.7% Mon; Samsung −10%, SK Hynix −8%. [cn13 / reu]
- **10/12 周一**: Broadcom's Hock Tan and Intel's CEO warned financing could become a major headwind to the AI build-out. [cn15]
- **10/13 周二**: KOSPI fell >6% (5th straight day of Korean chip selling), Kioxia −13%; a CoreWeave bond issued in June yielded 15% vs 9.625% at issue. [reu]
- **10/14 周三**: Sep CPI 3.7% YoY / 0.6% MoM (gasoline-led), core 2.6% YoY → OS class HOT. [OS CPI post book]
- **10/15 周四**: Hot PPI; retail headline strong, control group soft; TSMC beat the top of guidance; top-20 global AI/semis shed >$1tn so far this week (CNBC). [OS post books / cn15]
- **10/16 周五 SGT**: Warsh declined to prejudge October → Kalshi Oct hike ~30%→13–15%; Dec ~76–78% unchanged. [cnw / OS Warsh post book]
- **10/16 周五 US**: Nasdaq −2.1%, S&P −1.1%, SOX −3.83%, VIX +~21% to ~20; Brent touched $110 (first since May, Hormuz); CRWV −~12% (>25% for the week). Nasdaq's worst week since late June. [ap / sch / yh]

3. Event calibration

- Fed Chair Warsh x IMF Georgieva → neutral: Brier OS 0.38 vs uniform 0.667 vs base None
- TSM Q3 2026 Earnings → beat: Brier OS 0.755 vs uniform 0.667 vs base 0.167
- US CPI Sep 2026 → HOT 偏热: Brier OS 0.875 vs uniform 0.667 vs base 0.349
- US PPI Sep 2026 → hot: Brier OS 0.875 vs uniform 0.667 vs base 1.261
- US Retail Sales Sep 2026 → strong: Brier OS 1.005 vs uniform 0.667 vs base 0.724

We beat uniform on only 1/5 events: outcomes kept landing in tails we under-weighted. Fix already live (10/16): regime-aware calibration caps the middle scenario at 45% in high-vol regimes; earnings beats split into tailwind/headwind playbooks; central-bank pre-books add an 'other officials' panel.

4. Themes

Weakest 1-week: JP Memory 存储 -25.3%; KR Components 被动元件 -23.2%; KR Advanced Packaging 先进封测 -21.3%; KR Memory 存储 -21.0%; KR PCB 印刷电路板 -20.8%. Strongest: JP Power Grid 电网 +3.1%; KR Battery 电池 +0.5%; KR Defense/Space 国防航天 -0.3%.

5. Thesis, steelman, falsifier

Our read: a financing-spread, memory-competition and de-crowding de-rating, not (yet) a demand break — we saw no evidence of EPS cuts and TSMC now sees FY26 USD revenue growth of ~44%. Steelman: financing stress at neoclouds becomes a demand problem for GPUs and memory. Falsifiers: neocloud capex cuts, falling GPU rental prices, hyperscaler capex guide-downs in late-October earnings.

6. Next two weeks

- 2026-10-21: SPCX earnings + call 财报 — TENTATIVE (Yahoo calendar; confirm on IR)
- 2026-10-22: TSLA earnings + call 财报 — TENTATIVE (Yahoo calendar; confirm on IR)
- 2026-10-23: MXL earnings + call 财报 — TENTATIVE (Yahoo calendar; confirm on IR)
- 2026-10-27: GLW earnings + call 财报 — TENTATIVE (Yahoo calendar; confirm on IR)

- 2026-10-27/28: FOMC decision + Chair Warsh press conference｜FOMC 利率决议 — CONFIRMED (federalreserve.gov)
- 2026-10-29: EME earnings + call 财报 — TENTATIVE (Yahoo calendar; confirm on IR)
- 2026-10-29: KLAC earnings + call 财报 — TENTATIVE (Yahoo calendar; confirm on IR)
- 2026-10-29: PWR earnings + call 财报 — TENTATIVE (Yahoo calendar; confirm on IR)
- 2026-10-29: SIMO earnings + call 财报 — TENTATIVE (Yahoo calendar; confirm on IR)
- 2026-10-29: US GDP Q3 advance + Sep PCE — TENTATIVE (verify bea.gov)
- 2026-10-29/30: BOJ MPM + Outlook Report｜日本央行会议 — CONFIRMED (boj.or.jp)
- 2026-10-30: INTC earnings + call 财报 — TENTATIVE (Yahoo calendar; confirm on IR)

Valuation: no scenario revisions this week (price moves are not material information); TSM structure unchanged after earnings. Full teaching, source ledger and assumption register: Chinese edition.
