US PPI (Sep 2026) — Post-Event Review (English) v20261016-0759-post

Final (close) | Locked pre-event book v20261014-1806 (2026-10-14T18:06), not rewritten | Not investment advice

30-second take

1. **What happened:** US PPI (Sep 2026) final_demand_mom = +1.3% vs locked consensus 0.5% / locked OS 0.5%. Locked-rule bucket: **hot**; quality bucket: **hot**.
2. **Markets:** 10Y -10.1bp on the day, of which -10.9bp happened BEFORE 08:30; release window (08:29→09:15 ET) -2.7bp, 2Y (futures est.) -2.0bp. Kalshi October hike 28% → peak 36% → 28% at T+45 (prior-day 30%).
3. **Lesson:** split the time windows; a spike that reverses = the market looked through the headline. Tech weakness (NDX -0.05%, SOX -0.88%) was mostly pre-release (AI-credit/positioning), not this print.

Claim class 声明类别: CONFIRMED (actual) / MARKET EXP / HYPOTHESIS (locked) | Source 来源: BLS public API v1: SA indexes for MoM (WPSFD4, WPSFD49104, WPSFD49116), NSA for YoY (WPUFD4…); * = NSA series …; consensus/OS = locked v20
Thinking 思考: Look at the decision variable (retail: control group; PPI: FD + ex F/E/T), not the headline. Empty bar = not in lock. | Not investment advice 非投资建议

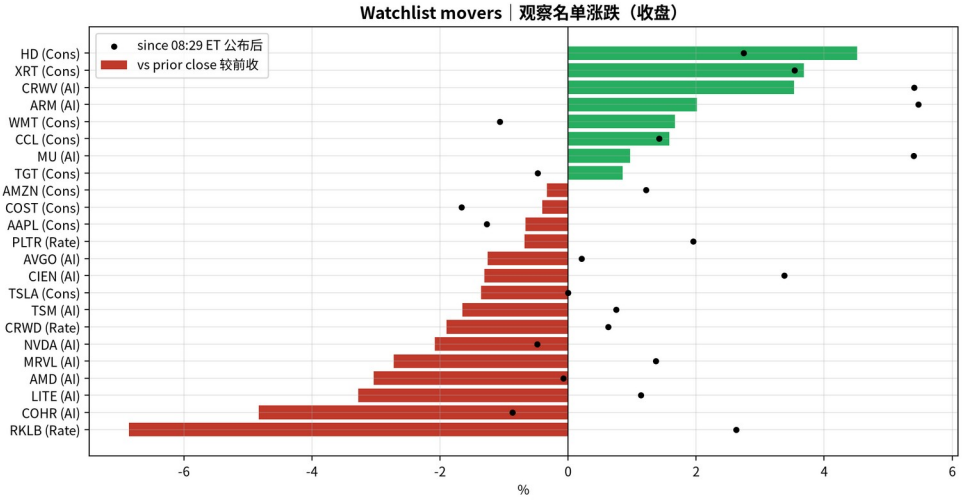

Claim class 声明类别: CONFIRMED (official levels; OS-computed % from SA indexes) | Source 来源: BLS public API v1: SA indexes for MoM (WPSFD4, WPSFD49104, WPSFD49116), NSA for YoY (WPUFD4…); * = NSA series (no SA published)
Thinking 思考: Where did the heat come from? Energy/gas = price, not volume (retail) or a see-through supply shock (PPI) — unless it leaks into services. | Not investment advice 非投资建议

Claim class 声明类别: CONFIRMED (prices); attribution = INFERENCE | Source 来源: yfinance 1m/1d, 2026-10-15 close
Thinking 思考: Dots ≈ bars → the move was mostly pre-release (not this data). AI = AI chain, Rate = rate-sensitive, Cons = consumer. | Not investment advice 非投资建议

US PPI (Sep 2026) — chain post-mortem｜因果链逐环复盘

绿=成立 Held · 橙=部分 Partial · 红=断开 Broke

Claim class 声明类别: INFERENCE | Source 来源: OS post-mortem vs locked pre-event chain
Thinking 思考: Read left→right; the first red box is where the pre-event story broke — that is the lesson, not the final price move. | Not investment advice 非投资建议

Claim class 声明类别: CONFIRMED (prices) / INFERENCE (attribution) | Source 来源: yfinance ^TNX 1m, 2026-10-15
Thinking 思考: If the pre-release bar dominates, the day's move belongs to other drivers (Fed speakers, AI-credit flight to safety, oil) — not to this print. | Not investment advice 非投资建议
